

Problem Statement 4

Social Networking Website

In this problem statement you have to make your own social networking site, something like Facebook. So get ready guys.... Open up your grey cells and implement what you have been using for years.....

Some basic ideas/modules:

- A login page and a Sign up page.
- A wall where you can see your friend's status as well as comment on it.
- User Profile.
- Functionality to upload anything – documents, pictures, etc.
- Adding your friends
- Making communities.
- Adding events and event reminders.
- Sharing images, videos, events.
- Privacy settings by allowing to show any content of your profile to
 - Everyone
 - Friends of friends
 - Friends only
 - Custom Sharing

Many more ideas can be implemented Just bring out the Zuckerberg in you!!!

Rules:

1. Use of CMS like Wordpress, Joomla etc is not allowed. Any use of it can disqualify you from the entire event.
2. You are not allowed to use any open source libraries except jQuery.
3. Cross browser compatibility is a must.
